Estimated Financial Impact of McDonald's Significant Refranchising Transactions

The Company expects to complete the sale and licensing of its existing businesses in China and Hong Kong to a developmental licensee organization in the coming weeks. This will mark the achievement of the Company's target to refranchise about 4,000 restaurants by the end of 2017, with the other major transactions being Singapore and Malaysia (Q4 2016), Sweden, Denmark, Norway and Finland (Q1 2017) and Taiwan (Q2 2017).

The combined impact of these transactions on our near term annualized consolidated financial statements, assuming comparable performance as 2016, is expected to result in the following:

| Financial Measures | Inc / (Dec)* | Further Information |
|----------------------|-------------------|------------------------------------------------------------------|
| Revenues | (\$4 billion) | Sales by Company-operated restaurants along with rent and |
| | | royalty income from conventional franchisees will be replaced by |
| | | royalty income from developmental licensees |
| Systemwide Sales | No impact | No expected impact to total Systemwide sales. Sales for these |
| | | markets are expected to be approximately \$6.5 billion, all of |
| | | which will be classified as franchised sales |
| Operating Income | (\$300 million) | Represents less than 4% of consolidated operating income |
| Earnings per Share | Limited long-term | The Company plans to use transaction proceeds to repurchase |
| | impact; negative | shares, the result of which will limit the long-term impact of |
| | impact of a few | these transactions on earnings per share. However, the |
| | cents per quarter | Company expects negative impact of a few cents per quarter on |
| | on EPS through | earnings per share through third quarter 2018, due to the nature |
| | 3Q'18 | of the weighted average shares outstanding calculation |
| Capital Expenditures | (\$200 million) | Company generally does not fund capital expenditures in |
| | | affiliated and developmental licensee markets |
| Operating Margin % | Increase | Higher operating margin percent |
| Free Cash Flow | Increase | Increase in free cash flow |
